Line 90 script error character 1

Line 90 script error character 1

I've been too lax with performing DB backups on our internal servers. Is there a simple command **line** program that I can use to backup certain databases in. Description: To ouptut an empty **line** using the ECHO command simply append a dot to the command. Otherwise the ECHO command will show the current echo state. If you want to save your **character**'s html file to your hard drive, Netscape seems to work better. Many people have found that saving them as Word documents works well.
