Meta data file errors

Meta data file errors

I'm trying to insert a large CSV **file** (several gigs) into SQL Server, but once I go through the Import Wizard and finally try to import the **file** I get the following. Hey Neil, This was a great explanation on **Meta** Tags and open graph. I installed a plugin by WP Engine to help make my posts standout! It works great, except for on. You could inspect the **errors** given by the Remove-Item cmdlet. Use the ErrorVariable parameter on Remote-Item to store its **errors** in a variable, then loop. Select the **file** input elements with files you want to parse. before is an optional callback that lets you inspect each **file** before parsing begins.
